

Greenhouse Gas Emissions
Independent Verification Report (Limited Assurance)
To: DyDo GROUP HOLDINGS, INC.

August 7, 2025

Japan Audit and Certification Organization
for Environment and Quality (JACO)
3-4 Kandakajicho Chiyoda-ku, Tokyo, Japan

President

Yoshiaki Okajima

Japan Audit and Certification Organization for Environment and Quality (JACO) has been engaged by DyDo GROUP HOLDINGS, INC. (hereinafter referred to as "the Organization") to conduct independent verification of its greenhouse gas (GHG) emissions information.

1. Purpose and scope of verification

With regard to GHG emissions information for fiscal year 2024 (April 1, 2024 to March 31, 2025) reported by the Organization, the verification was conducted.

1) Scope 1 and Scope 2 Greenhouse gas emissions

GHG emissions information of 99 domestic sites of DyDo DRINCO, INC., DyDo Beverage Service, Inc., DyDo Business Service, Inc., DAIDO Pharmaceutical Corporation and Tarami Corporation.

2) Scope 3 Greenhouse gas emissions as defined by the organization (category 1, 4, 9 and 13)

The Organization revised a part of its GHG emissions information that was used for the verification based on the verification results. The responsibility for preparing a calculation report and reporting GHG emissions is in the Organization and our responsibility is to express an opinion on GHG emissions stated in the calculation report by independent standpoint.

2. Verification procedure

JACO conducted verification in accordance with ISO 14064-3:2019; Greenhouse gases -Part 3: Specification with guidance for the verification and validation of greenhouse gas statements. We conducted the following activities as part of limited assurance

- Hearing or document inquiries to the Organization's officials who are responsible for identifying and accounting greenhouse gas emissions;
- Evaluation of the application of the accounting criteria, the method of data measurement, the assumptions adopted by the Organization as well as its basis, and the description of the GHG statement related to the information (data) used to determine the GHG emissions; and
- Verification by sampling in order to confirm accuracy of GHG emissions.

Verification activities applied in a limited level of assurance verification are less extensive in nature, timing and extent than in a reasonable level of assurance verification.

3. Conclusion

Based on the process and procedures conducted, there is no evidence that the results of the calculation reported by the Organization:

- is not materially correct and is not a fair representation of GHG data and information;
- has not been prepared in accordance with the related International Standards on GHG quantification, monitoring and reporting, or to relevant national standards or practices.

Verified greenhouse gas emissions

Scope 1: 15,243 tCO₂e, Scope 2: 10,821 tCO₂e, Scope 3: 194,297 tCO₂e

Details of Scope 3 emissions; Category 1: 74,179 tCO₂e, Category 4: 9,699 tCO₂e,
Category 9: 22,354 tCO₂e, Category 13: 88,065 tCO₂e

The Organization and JACO did not have any specific conflicts of interest and carried out verification on an independent basis.
